

AVIOR COMPUTING COMPANY BACKGROUNDER

Avior Computing Corporation is a leading innovator in compliance management solutions. Founded in 2003 by enterprise software and networking industry veterans, Avior's solutions ease the pain and reduce the cost of compliance and risk management processes. Avior provides organizations with real-time views and actionable information on their compliance and risk position for both internal as well as third-party (vendor) applications. Avior delivers two solutions to assist in compliance process management, Avior BenchMark, and Avior Clearview.

Avior's BenchMark solution supports compliance regulations and initiatives such as: Sarbanes-Oxley, GLBA/FFIEC, BITS Shared Assessments SIG/AUP, COBIT, PCI, HIPAA, and various state and international privacy laws. Avior BenchMark is available as a hosted solution, or on an appliance for deployment at the enterprise. Avior BenchMark includes Knowledge Modules that provide specific templates, pre-built workflows, and tailored reports for specific compliance applications. With the help of our Knowledge Partners, Avior BenchMark provides complete solutions for Vendor Risk Management, Information Privacy Assessment, and Anti-Money Laundering/Bank Secrecy Act compliance assessment. Avior BenchMark replaces costly and cumbersome manual assessments involving spreadsheets and word documents with a streamlined and automated process, enabling better risk decision-making, and significantly reducing the cost and pain of manual assessment activities.

For organizations subject to more than one regulation or standard, mapping of compliance requirements to controls and assessment questions is a significant challenge. The problem is compounded by changing regulations, standards, and the controls used by organizations. Developing and maintaining mapping between specific regulatory requirements, standards, controls, and assessment questions requires significant effort, and is a costly part of the compliance challenge. Many organizations treat compliance as individual projects within organizational silos. This approach is inefficient, and results in a duplication of effort and unnecessary expense. Avior's patent-pending ClearView solution provides a new automated approach to developing and maintaining compliance mappings & associations. Available as a Software as a Service application, ClearView uses sophisticated analytics to model and associate compliance regulations and standards. ClearView provides an extensive set of controls with automated mappings to the various regulations and standards so customers do not have to do this manually. In addition, Clearview provides an extensive library of assessment questions to test the compliance status of controls. ClearView supports numerous regulations and standards including pre-built mappings for ISO27002, BITS SIG, PCI DSS v1.1, GLBA, HIPAA, numerous international and state privacy regulations, Bank Secrecy Act and Anti-Money Laundering regulations, and others. "Assess once comply many times"

Avior maintains key partnerships with leading compliance consulting organizations, including The Reymann Group, Minnesota Privacy Consultants, and Informatica Security. Avior is also a vendor member of the BITS Shared Assessments program, and a licensee of the BITS standards for vendor risk assessment.

Avior's clients include leading banks, services providers, insurance companies, and other organizations impacted by compliance regulations.

Avior is based in Nashua, NH. For further information on Avior and our compliance solutions, please visit www.avior.com
