AVIOR COMPUTING ADDS REMEDIATION, DASHBOARDS TO BENCHMARK AND CLEARVIEW COMPLIANCE MANAGEMENT SOLUTIONS

New capabilities ease remediation management, enhance operational and executive reporting on compliance and risk, and deliver superior ROI

NASHUA, NH, March 29, 2010 – Avior Computing Corp. announced today several new capabilities for the BenchMark and ClearView compliance and risk management solutions. The new software extends the breadth of Avior’s compliance management solutions to include better management through the lifecycle of risk and compliance, to include:

- Remediation management, to extend the breadth of risk and compliance lifecycle management to include this key area. Remediation management delivers a closed-loop approach to risk and compliance process management.
- Pre-built and customizable dashboards, with drill-down functionality built in. Risk heat maps are also provided in dashboard format. With the provided dashboards, managers can interact dynamically with data, and easily create “what-if” scenarios. Pre-built dashboards include remediation impact heat map, remediation status, remediations by quarter, organizations by average risk, and many more.
- Customizable reporting and reports library, with standard output to .pdf and .csv file formats. Extensive library of pre-built reports, and the ability to customize reports quickly and easily. Reports provided include assessment status, remediation impact heat map, remediation status, risk category trends, top organizations by risk, and many more. The reporting capability also displays authoritative sources for all regulations, standards, and requirements in ClearView.

“Risk and compliance managers today face numerous challenges, including reducing risk through proactive remediation management, and reporting on the risk and compliance posture of the organization”, said Steve Katz, President

Security Risk Solutions, and former CISO of Citigroup, Merrill Lynch, and JP Morgan. “The new remediation, reporting, and dashboard capabilities will prove highly useful in managing risk and compliance.”

About Avior Computing

Founded by industry veterans, Avior Computing is a leader in automated compliance management. Avior ClearView is a dynamic Web service that automates the mapping of regulations, standards and controls to electronic assessment questionnaires. Avior BenchMark automates the process of developing compliance policies and procedures from overlapping and redundant privacy regulations, and is available as either a SaaS or premise-based solution.
